

NOVABONE[®]

BIOACTIVE SYNTHETIC GRAFT

NovaBone Putty[®]

NovaBone Putty is a versatile bone graft substitute that is ready to use out of the package with exceptional handling characteristics that will save time and improve placement.

The specially formulated consistency means it can be packed into any size or shape void without sticking to surgical gloves. The binder resists migration during irrigation allowing the bioactive component to stay as placed.

NovaBone is packaged in sterile thermoformed packs, as well as syringes for controlled delivery of bone graft.

NovaBone Putty

Reference No.	Description
NB0602	2.5cc, NovaBone Putty
NB0605	5cc, NovaBone Putty
NB0610	10cc, NovaBone Putty

NovaBone Putty – Syringe Delivery

Reference No.	Description
NB2601	1cc, NovaBone Putty
NB2602	2.5cc, NovaBone Putty
NB2605	5cc, NovaBone Putty
NB2610	10cc, NovaBone Putty

Exceptional Handling Characteristics

- Highly malleable, easy to mold and pack into any defect
- Stays at the surgical site, will not migrate during irrigation
- Ready to use out of the package
- Does not stick to surgical gloves.
